INSPIRING INDIANS

## A LEADER IS ONE WHO KNOWS THE WAY, GOES THE WAY AND SHOWS THE WAY

**Arif Khan**  
Founder & CEO, Coredge

**A**rif is a problem solver who enjoys doing things unconventionally and innovatively.

He held the top leadership position at Ericsson and is acclaimed for his influence in transforming the Ericsson cloud portfolio. After Ericsson, he founded VoerEir- a Swedish cloud-testing solution provider. Mr Khan is well-known for being an active participant in several open-source groups and a thought leader in multi-cloud 5G and edge computing.

**Coredge: Give your business an edge with cloud computing!**

We take the complexities out of the cloud so that you can focus on your business.

The “Make in India” and “Atmanirbhar Bharat” initiatives in which the Indian start-ups and innovators played a significant part in transforming covid crisis into an opportunity for Atmanirbhar Bharat, and that’s when Coredge was founded in October 2020, sharing the same sentiment.

**Coredge 3Cs: Competent, Committed and Consistent**

This is what makes us different from others!

Coredge specializes in providing

solutions to meet the demands of modern market trends, such as edge infrastructure management and the need for hyperlocal cloud infrastructure. We address the administration and orchestration requirements of modern cloud-native applications.

At Coredge, we value giving back to the communities where we operate and endeavour to improve and make a difference in the lives of the people around us. Our goal is to create economic value in a socially inclusive, responsible, and effective way to build a solid firm for the future.

**Mission:** We prioritize client needs and make cloud computing simple so you can focus on your business.

**Vision:** To leverage modern technology to become the transformational enabler for improved efficiencies. We work hard to build products and provide solutions to help our clients adopt and benefit from new technologies at a never-before speed.

**Coredge: Bringing Cloud and Edge Computing Together!**

Innovative unified cloud management platforms from Coredge, such as Cloud Orbiter and Cirrus Cloud Platform, are designed for distributed clouds. By enabling central operations and providing automation to distributed clusters, these systems assist reduce complexity and high costs. It can manage bare metal, containers, and virtual machines on any kind of infrastructure worldwide. Various cloud technologies include hybrid, sovereign, and industry clouds for R&D, healthcare, and education. The main use case for which Coredge is creating platforms and solutions includes industrial IoT, wearables, self-driving cars, OTT, AR/VR, 4K streaming, voice, and video over IP.

**Recognition & Applaud**

- Top 30 Edge Computing leaders in the world by Data Economy
- One of the top 10 CEOs of the year 2021 under 40 years.
